

# Alabama SBS / ALDOI Course Approval Evidence - 2026-07-07

---

Source scope: Gmail search/read on 2026-07-07 found both SBS course-approval notifications and the separate ALDOI CE Course Approval Letter thread for Alabama Provider 500033130. Claude had already logged and shipped the public go-live/code path for the four approval-notification messages; this evidence note preserves the remaining approval-letter thread before Gmail cleanup.

## Evidence details

---

- SBS notifications came from sbs@naic.org, subject pattern Course Approval - AL Course: ..., to admin@nationalcourseportal.com, with Notification Type: Course Approval, Change By: MOOREC, and Notification Date: Jul 7, 2026.
- Separate ALDOI approval-letter messages came from From the NAIC on behalf of ALDOI CE <sbs@naic.org>, subject CE Course Approval Letter, to admin@nationalcourseportal.com, in thread 19f3d7afc4985f0b.
- The approval letters state Course Method: Self Study (Online), Provider ID 500033130, and approval date July 07, 2026.

- No course expiration date was stated in the messages read in Gmail. Treat Alabama course-expiration/renewal date as `VERIFY` until SBS or ALDOI source evidence is checked.
- Alabama proctor rule remains operationally material: online/self-study final exams must enforce disinterested third-party proctoring and signed no-assistance affidavit before completion/credit operations.

## Go-live and cleanup state

---

- Public go-live was already recorded by Claude/Codex in `docs/national-expansion/CODEX-FILING-ACTION-STATUS-2026-06-20.md`: the four Alabama CE courses were un-closed, promoted to indexable, and deployed after gates passed.
- The four SBS notification emails ( `19f3d873be7bdda4`, `19f3d87093613ef3`, `19f3d875393caf22`, `19f3d872ff5384e3` ) were already in Gmail Trash when Codex rechecked them on 2026-07-07.
- The four ALDOI approval-letter Inbox messages ( `19f3d7afc4985f0b`, `19f3d7c279720ca6`, `19f3d7d66f6f5176`, `19f3d7f5e321c8d5` ) were logged here, then moved to Gmail Trash. Post-cleanup Gmail search `in:inbox "500033130" newer_than:7d` returned zero matches, and all eight Alabama approval message IDs listed above showed the `TRASH` label on readback.
